DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,3,4, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Silverbrook et al (U.S. Pat. 6,588,952).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Silverbrook discloses:

- ***regarding claim 1***, a body complementary to a removable inkjet cartridge of a type having a pagewidth printhead and an ink supply (Column 2, Lines 22- 24, 49 – 51; Figure 3)
- an integrated circuit assembly arranged to test an authentication device of said cartridge (Column 4, Lines 46 - 58)

Art Unit: 2853

- **regarding claim 2**, wherein the authentication device comprises a quality assurance chip (Column 4, Lines 46 - 58)
- **regarding claim 3**, wherein the body defines a recess to receive the removable inkjet cartridge (Figures 4, 5, 8,9)
- **regarding claim 4**, integrated circuit assembly includes a connector mounted upon the body at a location to connect with the quality assurance chip upon insertion of the removable inkjet cartridge (504 of Figure 1) into the recess (Column 4, Lines 46 - 58)
- **regarding claim 5**, wherein the integrated circuit assembly comprises a portion of a control circuit of the inkjet printer cradle, said control circuit arranged to indicate a failure to verify the authentication device (Column 4, Lines 46 – 58)

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Uhlenhake whose telephone number is (571) 272-5916. The examiner can normally be reached on Monday - Friday 8-5.
